## **Model 960-TA Flat Product Ink Jet/Labeler** **Transport System**

March -2025

**Lakewood New Jersey...** Dalemark Industries, Inc., a leader in coding, product transport and labeling systems for Industrial and Consumer Packaging, is pleased to announce that due to a customer cancellation we are offering a new **Model 960-TA Transport System** at a reduced price.

Our American Made heavy duty Model 960-TA lug feed Transporter was designed for 24/7 operation and features a solid ½" Painted Steel Frame, 1/3 HP Drive, Adjustable Hopper Guides, Variable Speed Soft Touch Controls and an integrated Product Collection Tray. This Transporter is ideal for the feeding and printing, coding and/or labeling of a wide range of knock down/flat products such as corrugate sheets, trays, lower test corrugate cases, sleeves, cartons, etc. from .009" to .500" thick. This system has been setup with a 20" wide Flexographic Print Head but we can easily retrofit to accommodate a variety of customer specified or Dalemark Product Identification Systems. Maximum product size for this system is 26" W x 21" L at run speeds up to 75 ppm. Most machine adjustments can be done by hand including product width, length or separation. An Optional Count-Up/Count-Down Counter can be added to ensure exact product volume is processed eliminating costly overruns.

The Series 960-TA is designed for integration with most commercial identification systems including Large and Small Character Ink Jet Coders, P/S Label Applicators & Label Printer/Applicators, Laser Coders, etc. Additional capabilities include adding a Bar Code Reader or Vision System to provide the customer with a complete off-line flat product identification system.

**The Model 960-TA from Dalemark - simplicity, flexibility, and highest quality standards.**  
**MADE IN THE USA**

**Dalemark Industries, Inc** offers a track record of 19 Patents and a history of over 74 years of experience meeting the needs of the packaging industry with Ink Jet, Flexographic & Thermal Printers, P/S Labelers, Round & Flat Product Handling Systems and related products.
