INSTALLERS, SERVICE & LINE MECHANICS: PLEASE READ THIS MANUAL AND FAMILIARIZE YOURSELF THOROUGHLY BEFORE ATTEMPTING TO INSTALL OR SERVICE THE DALEMARK EQUIPMENT DESCRIBED HEREIN. FOR FURTHER ASSISTANCE, CONSULT OUR FACTORY STAFF.

INSTRUCTION AND PARTS MANUAL

SERIES 200 HEAVY DUTY CONVEYOR PRINTERS

MODEL .			
SERIAL :	NO.		

When ordering, always provide the following information:

- MODEL NUMBER
- SERIAL NUMBER
- PART DESCRIPTION & PART NUMBER AS SHOWN IN PARTS LIST

DALEMARK INDUSTRIES, INC. EXCEL PARK 2 575 PROSPECT ST., SUITE 211-212 LAKEWOOD, NEW JERSEY 08701 PHONE: 732-367-3100

FAX: 732-367-7031 E-Mail Address: sales@dalemark.com Website: www.dalemark.com

GLOSSARY

Print Wheel: Cylindrical unit mounted at end of printer arm. Tie Knots: Plastic rings encircling print wheel, utilizing interlocking ribs for "PERMA-GRIP" type. "PERMA-GRIP" TYPE: Individual alphabetical and numerical rubber type sets which lock into print wheel when inserted between tie knots. Dalemark brand name. Sleeve: Optional logotype carrier which fits over print wheel in place of tie knots. Logotype: One-piece message casting from special order with self-stick backing which adheres to sleeve. Flange Nut: Hand tightened threaded ring at top of print wheel. Loosens tie knots for easy installation of rubber type or message changes. "INCA-ROL": Pre-inked disposable ink roller installed in juxtaposition to print wheel. Approximately 250,000 impressions. Dalemark brand name. "SRR": Self Resaturable Ink Roller, up to 1 million impressions, on-line reinking as needed. Supply of Dalemark recommended ink required. Recharge sparingly. Dalemark brand name.

OPERATING PROCEDURES

- STEP 1: Mount the Printer on the desired part of your conveyor frame with 3/8" bolts through the two holes in the mounting block.
- STEP 2: Mount the Printing dies on the print wheel.
 - A) If you are using the "Perma-Grip" dies, loosen the print wheel nut to loosen the tie knots.
 Press the type into the tie knots in the proper sequence, and lock the type into place with the print wheel nut.
 - B) If you are using Sticky Back Dies, clean off the sticky back sleeve. Peel off the blue plastic backing from the die making sure not to remove any of the gray adhesive cloth from die. Press the die into place on the sleeve, making sure not to have any wrinkles in the backing and/or bubbles under the die.
- STEP 3: Adjust the height and the depth of the Printer, when there is no carton on your conveyor. When the Unit is properly adjusted, the Printer should move approximately 1/2" on contact with the surface to be marked.

READY?

FINAL CHECKS:

Does Ink Roller make <u>kiss contact</u> with type face?

If not, adjust by loosening the knurled nut under ink roller at base of ink roller shaft.

Has the ink roller been inked?

The Dalemark "Inca-Rol" is pre-inked and is replaced when exhausted.

An SRR roller should be inked sparingly, and test run manually until the desired density is obtained.

Is the printer shaft rigid? Bracket bolts should be tightened.

Does print wheel make contact with passing carton while overlapping the leading edge about half an inch.? Adjust this alignment by loosening mounting bolts until print wheel can be swung into position, retighten bolts. Spring tension can be adjusted by manipulating set screw in spring housing.

Have you made provision for secure, convenient storage of "Inca-Rols" or SRR's, ink supply and Dalemark Solvent?

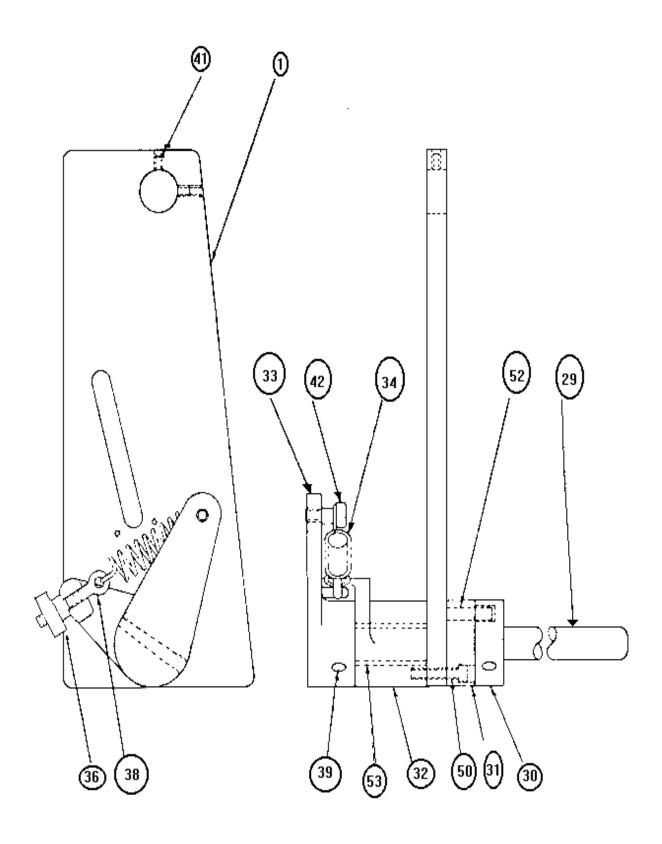

Have your made a mental note, now that installation is completed, that you will make certain this manual will be properly filed by an appropriate employee of your company? Do so.

—— MAINTENANCE ———

Cleanliness is the only key to trouble-free operation of Dalemark conveyor printers. Ink cleanup should be done with Dalemark Solvent.

Alcohol shortens the life of rubber type and logos. When printer is not in daily use, type should be kept in a cool, dry place.

On-line cleanup frequency will be dictated by printing quality. If ink is drying too quickly, experiment with small amounts of cellosolve. Too slowly? Small amounts of alcohol.

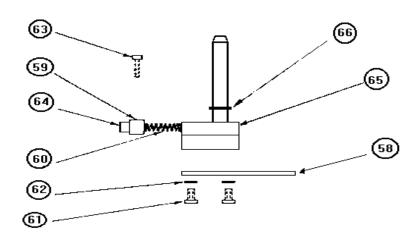

SERIES 200 FRAME ASSEMBLY
