News Release

Product Transport Systems

August 2026

Lakewood New Jersey... Dalemark Industries, Inc., is a leader in flat and round product Transporters designed to be integrated with a wide range of Product identification Devices including Continuous Ink Jet (C.I.J.) & Thermal Ink Jet (T.I.J.) Coders, Pressure Sensitive Label Applicators and/or Pressure Sensitive Label Printer/Applicators, Laser Coders, Thermal Transfer Printers, Bar Code Readers/Verifiers and Vision/OCR Systems.

Most primary packaging Transports feature extensive Stainless Steel construction, especially in product contact areas allowing use in a wide range of industries including Pharmaceutical, Food and Medical Device. Simple designs and quality construction provide a quick learning experience for any operator. Our Flat Product Transport Systems are designed to accommodate flat products such as Lid Stocks, Pouches, Corrugated Boards, Paperboards, Multiwall Bags, Corrugate Cases/Blanks and Chipboard Cartons while our Round Product Transport Systems can accept round, oval, rectangular and square containers including plastic, composite, glass or metal. Units incorporate Friction, Pick & Place or Vacuum Shuttle Feed depending upon the unit, application and required run speed. In most cases no tools are required for product changeover as we try to enable hand adjustment capabilities wherever suitable. All of our units are available with a Pre-Determining or Batch Counter to verify the production run and ensure only the exact amount of packages are processed for distribution, eliminating costly overruns.

Systems are designed for integration with most any commercial Product Identification System to provide our customers with the ability to maintain an in-house product marking, labeling or reading solution where in-line integration is not suitable or possible

Dalemark Industries, Inc offers a track record of 19 Patents and a history of 75 years of experience meeting the needs of the packaging industry with Ink Jet, Flexographic & Thermal Printers, P/S Labelers, Round & Flat Product Handling Systems and related products.
